

HEMCO is pleased to announce the NEW UniMax Floor Mount Fume Hood.

The UniMax series of hoods has been expanded to include a wide selection of models that feature greater interior working dimensions. Standard models range from 6 feet to 24 feet wide, 4 feet to 8 feet deep, and 7 feet to 16 feet high. Tall apparatus / distillation processes, roll-in reactors, or long integrated instrumentation systems can be easily accommodated in these hoods.

UniMax Floor Mount Hood's are constructed of chemical resistant, non-conductive modular panels featuring composite resin surface material. This modular design allows for onsite assembly and the ability to disassemble at a later date, move and reassemble. Custom sizes and designs can also be designed and built to exact specifications.
